NATIVE APP

The Problem

- ✗ Communication scattered across email, Slack, GroupMe
- ✗ No structured organization for programs
- ✗ No role-based access for facilitators vs. interns
- ✗ Generic tools not built for the internship experience

The Solution

- ✓ One app — messaging, files, and announcements
- ✓ Programs with organized channels and categories
- ✓ Tailored permissions for every role
- ✓ Purpose-built for how internships actually run

CORE FEATURES

Everything your program needs.

Real-Time Chat

Instant messaging with rich text, typing indicators, and read status.

Announcements

Controlled channels where only facilitators can post updates.

Threads

Focused conversations branching off any message.

File Sharing

Documents, images, and media shared in context.

Pins & Search

Pin key messages. Search across all channels instantly.

Notifications

Smart push alerts with per-channel mute controls.

ORGANIZATION

Structured for how programs run.

Programs

Separate spaces per cohort or initiative. Own channels, members, settings. Join with a simple invite code.

Channels & Categories

Conversations organized under categories. Text channels for discussion, announcements for updates.

Direct & Group Messages

Private 1:1 or group chats (up to 8). Mentor check-ins, project teams, quick questions.

Private Channels

Restricted access for leadership, sensitive topics, or team-only spaces. Full access control.

ACCESS CONTROL

The right people, the right access.

Owner

Full program control

Admin

Channels, roles, moderation

Facilitator

Announcements, invites

Intern

Discuss, share, collaborate

20 granular permissions · Custom roles · Per-channel overrides

EXPERIENCE

Fast. Native. Real-time.

Instant

Zero-delay message delivery

Native

60fps, haptics, gestures

Resilient

Auto-reconnect, smart sync

Secure

Google auth, encrypted tokens

● Ready to Deploy

From idea to application.

A fully functional, production-grade mobile app — designed, built, and tested end-to-end.
