NATIVE APP

Interns deserve better tools.

Existing platforms aren't built for internship programs. InternHub is.

The Problem

- ✗ Scattered communication across email, Slack, GroupMe, WhatsApp
- ✗ No structured organization for different programs
- ✗ No role-based access control for facilitators vs. interns
- ✗ Hard to find shared resources and pinned information
- ✗ Generic tools not designed for the internship experience

The Solution

- ✓ One app for everything — messaging, files, announcements
- ✓ Programs with organized channels and categories
- ✓ Facilitators and interns have tailored permissions
- ✓ Pinned messages, search, and shared resources built in
- ✓ Purpose-built for how internship programs actually work

CORE FEATURES

Everything your program needs.

A complete communication platform designed from the ground up for internship programs.

Real-Time Messaging

Instant message delivery with typing indicators and rich text formatting.

Announcements

Dedicated announcement channels so important updates never get lost.

Threaded Replies

Keep conversations organized. Discuss topics without cluttering the feed.

File Sharing

Share documents, images, and resources directly in conversations.

Pinned Messages

Pin important messages for quick reference. Deadlines and resources at hand.

Push Notifications

Never miss a message. Smart notifications with per-channel mute controls.

Global Search

Find any message, person, or channel instantly across your program.

Rich Profiles

Profiles with bio, status, avatar, and role badges. Know your team.

Reactions & Mentions

React with emojis. @mention teammates to get their attention instantly.

Structured for how programs run.

Each internship program is its own space — with channels, roles, and members that make sense.

Programs

Create separate spaces for each internship cohort, department, or initiative. Each program has its own channels, members, and settings. Invite participants with a simple share code.

Channels & Categories

Organize conversations into channels grouped by category — Welcome, General, Resources, or whatever fits your program. Text channels for discussion, announcement channels for updates.

Direct & Group Messages

Private 1-on-1 conversations or group chats with up to 8 people. Perfect for mentor check-ins, project teams, or quick questions — with all the same features as channels.

Private Channels

Restrict access to specific channels for leadership discussions, sensitive topics, or team-specific spaces. Granular control over exactly who sees what content.

ACCESS CONTROL

The right people, the right access.

A flexible role system that mirrors your organizational hierarchy.

Owner

Full program control.
Settings, members,
structure.

Admin

Manage channels, roles,
and moderation.

Facilitator

Announcements,
messages, invites.

Intern

Discuss, share files,
collaborate.

20 granular permissions · Custom roles with colors · Per-channel overrides

EXPERIENCE

Fast. Native. Real-time.

Built as a native iOS application — not a web wrapper.

Instant Delivery

Messages arrive the moment they're sent. Real-time updates for everything — messages, reactions, typing.

Native Performance

Smooth animations, haptic feedback, native gestures. Swipe to reply, long-press for actions.

Always Connected

Automatic reconnection and smart syncing. Handles network changes gracefully.

Secure by Design

Google authentication, encrypted token storage, and secure API communication.

● Ready to Deploy

From idea to application.

InternHub is a fully functional, production-grade mobile application — designed, built, and tested end-to-end. Ready to put in the hands of your next cohort.
